

Press Release

From: Michael C. Hritz, Director of Community Development
Date: May 14, 2015
Re: NORTH BRUNSWICK ANNOUNCES 2015 ROAD PROGRAM

The Township of North Brunswick's 2015 Road Program will launch next month and includes nearly \$2.6 million in street and utility improvements to six municipal roadways, according to Director of Community Development Michael Hritz. The schedule, which is weather dependent, includes a series of improvements from now through the end of the year.

A second phase of Hoover Drive from Farrington Boulevard to Schweitzer Place will be completely reconstructed, along with a much needed water system replacement. A third phase from Farrington Boulevard to the PSE&G right-of-way is expected for the 2016 program.

A complete road reconstruction will take place on Taylor Place from McKinley Avenue to Roosevelt Avenue, and on Yorke Road off of Livingston Avenue. Overhill Drive will be re-paved, and road work and a major drainage improvement will take place on Tulip Drive from Evelyn Avenue north to the dead end.

Reconstruction of Nassau Street on the east side of Georges Road will also commence this fall and include storm system upgrades. That project is funded in part with a grant from the New Jersey Department of Transportation Municipal Aid Program in the amount of \$350,000.

Mayor Womack and the Township Council have been steadfastly budgeting an average of \$3 million per year to maintain and improve the municipal road and utility system. Since 2001, the township has spent more than \$33 million repairing more than 111 Municipal roads and the associated utility infrastructure covering almost 30 miles.
